About

I am a dedicated and results-driven IT professional with a solid academic foundation, holding a Bachelor of Science in Information Technology. I am highly proficient in IT infrastructure management, ERP systems, server and network administration, and implementing various digital solutions. My practical experience has equipped me with expertise in optimizing system performance, ensuring data integrity and cybersecurity, and leveraging technology to enhance operational efficiency and contribute to business growth. I am passionate about utilizing my technical and problem-solving skills to support business objectives.
